ACID
ANTI-COPYING IN DESIGN

All Brintons plain carpets are made using 80% wool and 20% nylon for a perfect blend of beauty and wearability; the wool gives unparalleled softness while the nylon adds everyday toughness and 'bouncebackability'. Duet includes heathers, which are created by coloured flecks in the yarn to give depth of colour. Duet is made using a tufting process, rather than the traditional woven wilton method. We still use the same amount of care, and specially-blended yarns, so the end result is still very much Brintons quality.
